MN Dip & Read Tests for Metal Workshops

When metal parts are machined (drilling, cutting...) cooling lubricants or coolants are indispensable to guarantee the quality of the work piece as well as the lifetime of machines. The Dip & Read tests in this special selection provide valuable information to keep the coolant and the machine in good condition. All tests can easily be performed by chemically untrained persons.

Product information

Test	Product	Application	Gradation	REF
	pH-Fix 6-10	<ul style="list-style-type: none"> pH value is important for corrosion protection Quick and easy pH determination in coolants Optimal gradation for coolants 	pH 6.0 · 6.4 · 6.7 · 7.0 · 7.3 · 7.6 · 7.9 · 8.2 · 8.4 · 8.6 · 8.8 · 9.1 · 9.5 · 10	921 22
	QUANTOFIX® Nitrite	<ul style="list-style-type: none"> Nitrite indicates bacterial growth Nitrite may cause build-up of carcinogenic compounds (nitrosamines) At least weekly determination is recommended 	0 · 1 · 5 · 10 · 20 · 40 · 80 mg/l NO ₂ ⁻	913 11
	QUANTOFIX® Lubricheck	<ul style="list-style-type: none"> Tests concentration of coolants Units are commonly used buffer capacity (mmol/l KOH) Provides immediate results 	0 · 15 · 50 · 75 · 130 · 200 mmol/l KOH	913 36
	AQUADUR® 3-25	<ul style="list-style-type: none"> Tests water hardness in feed water Water hardness important for foaming and coolant quality 	< 3 · > 5 · > 10 · > 15 · > 20 · > 25 °d < 50 · > 90 · > 180 · > 270 · > 360 · > 450 ppm CaCO ₃	912 01
	QUANTOFIX® Nitrite/pH	<ul style="list-style-type: none"> Combines pH and nitrite on a single strip Easy stock-keeping Best value 	0 · 1 · 5 · 10 · 20 · 40 · 80 mg/l NO ₂ ⁻ pH 6.0 · 6.4 · 6.7 · 7.0 · 7.3 · 7.6 · 7.9 · 8.2 · 8.4 · 8.6 · 8.8 · 9.0 · 9.3 · 9.6	913 38
