

- the further development of F-BOB -

Testomat® 808 has been designed for use in the field of water treatment (e.g. osmosis plants, electroplating, large boiler plants, laundries, canteen kitchens). The feed water must be clear, colorless, and free of undissolved particles. The instrument is a limit value measuring instrument which automatically monitors the residual total hardness (water hardness) in water. The limit value to be monitored is determined by selecting the indicator here.

Performance features of Testomat® 808:

- Self-cleaning measuring chamber
- Low water consumption
- Cutting-edge electronics
- State-of-the-art indicator pump system
- Error display

- Indicator quantity display
- External flush valve control
- Limit value evaluation / External control
- Alarm processing
- Internal and external flushing via manual control
- 72 hours of unsupervised operation possible
- Selection between two indicator bottle sizes
- Two selector switches for interval measurement and limit value evaluation
