# Pool & Spa

Swimming and bathing are without doubt some of the most popular leisure activities, whether at school, in a competitive environment, for exercise or simply relaxation.

The concept of "Wellness" has created a new trend; wellness enthusiasts are people who have made a conscious decision to stay fit and active with the aim of achieving/maintaining good health and a general feeling of well-being and attaining harmony of body, mind and soul.

In order to achieve this goal, people make wide-ranging use of swimming pools, spas, and many other similar facilities.

Regardless of the motivation for swimming and similar activities, people attach great importance to clean and hygienic water both indoors and out.

## Water Treatment and Water Testing

State-of-the-art water treatment is an essential precondition for safe and healthy bathing and swimming – whether in private or public facilities. In order to satisfy health-related criteria while maintaining the value of such a facility, the golden rule for water treatment is "as much as necessary and as little as possible".

It goes without saying that the main water quality parameters need to be checked on a regular basis

in order to ensure an optimum water treatment programme in changing operating conditions. If testing shows that the hygiene-related parameters deviate from the target values or recommended limit values, the operator can immediately take corrective action to avoid potential risks to health before such risks are allowed to arise.

And this is where the system of Lovibond® water testing equipment and reagents comes into play.

The Lovibond® range of instruments provides operators of private and public baths with analysis systems that measure the actual condition and quality of the water with maximum precision. Moreover, the Lovibond® systems succeed in reconciling the seemingly irreconcilable goals of easy handling, safe reagents offering long-term stability, high detection accuracy, and reproducibility of results. We hope you will find the information on the following pages convincing.

# Rapid Tests

# Water Treatment

## pH value

The pH value of pool & spa water should generally be between the slightly acidic value of 6.5 and the slightly basic value of 7.6. Due to the use of various water treatment chemicals as well as ambient environmental effects, pool owners have to determine the pH of the water and correct the value as necessary.

## Disinfection

Nowadays, pool owners can choose from a range of modern water treatment agents that are often used in combination.

These water treatment chemicals are only effective within a limited pH range. Therefore in addition to checking the concentration of the water treatment chemicals, the owner/operator should also monitor the pH value of pool water and adjust it if necessary.

# Rapid Tests

## Three-Chamber Tester

The Three-Chamber Tester is a competitively priced unit for the determination of disinfectants and the pH value.

## Pooltester

The Pooltester is designed for the simultaneous determination of the most popular water treatment agents and the pH value.

## Multipooltester

Additionally the Multipooltester allows the determination of cyanuric acid, total alkalinity and calcium hardness.

## Highlights

- Easy to use
- Futuristic design
- RAPID tablets fast dissolving
- Highest accuracy

### Three-Chamber-Tester

<sup>5)</sup> Pack unit 5 pc

### Delivery content

- 5 in 1 Multi Pooltester
- Pooltester Chlorine - pH LR in a robust plastic case
- Cyanuric acid tube
- Dilution / shaker tube, 100 ml
- Dilution / shaker tube, 30 ml
- Cleaning brush
- Stirring rod
- 20 tablet reagents each DPD No. 1 Rapid, DPD No. 3 Rapid, Phenolred Rapid
- 10 tablet reagents each CyA-Test, Alk-Test, CAL-Test
- Instruction manual
- Statements (phrases-H and P)

### Delivery content

- Three-Chamber-Tester in a bubble pack or mini case
- Instruction manual

### Delivery content

- Pooltester in a sturdy plastic box
- Tablet reagents for 20 tests
- Instruction manual

## The Methods

The Minikits are developed for fast testing, mainly based on titrimetric methods

### Tablet count method

A specific number of tablets is added to a known volume of sample until a chemically induced colour change takes place. The number of tablets used is applied to a simple formula to calculate the test result. The measuring range may be expanded by varying the sample volume.

### Speed test

The speed test is based on reverse titration. After adding a reagent tablet to a calibrated test tube, the water sample is added slowly until the colour of the solution changes (e.g. from red to blue). The user can then obtain the result from the liquid level.

### Yes/No test

A Yes/No test tells the user whether a specific ingredient is present in the water and/or if its concentration is higher or lower than a defined level.

### Turbidity method

A two-section calibrated test tube is filled with the water sample and a reagent tablet added. The reagent creates a level of turbidity that is proportional to the concentration of the parameter being measured. The inner tube, which has a black dot on its base, is lowered until the dot is obscured by the turbidity. The result is read off from the water level in the inner tube.

### Highlights

- Easy operation
- Exact reagent dosing
- Measurement accuracy
- Tablet reagents with a guaranteed shelf life of 5 years

### Delivery content

- Kit in a plastic box
- Tablet reagents for an average of 30 tests
- Sample container
- Required accessories
- Instruction manual

# Scuba II Electronic Pooltester

Test equipment for the responsible  
private swimming pool and whirlpool operator

## Scuba II

## Technical Data

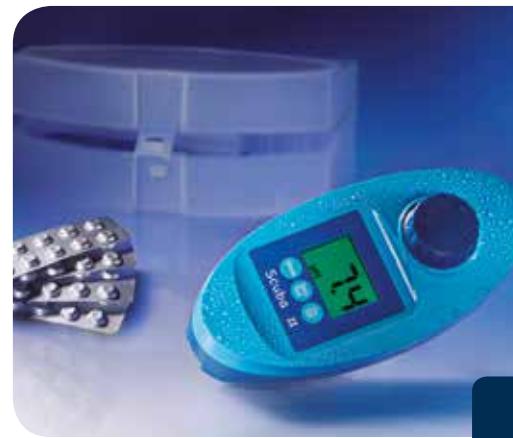

Every pool owner should check the most important parameters in his pool at regular intervals. This is the only way to ensure that water quality is maintained at an right level and to arrange dosing in an optimum manner.

The Scuba II enables the operator to check the pool water quickly and accurately. The integrated sample chamber filled by immersing it in the water. A tablet reagent is added and generates a characteristic colour which can be measured using the photometric principle. The result is then displayed on the screen.

Six parameters, **free chlorine, total chlorine, pH, alkalinity, cyanuric acid** and **bromine** are measured within a few minutes. Water analysis becomes a pleasure rather than a chore and more time is left for enjoying the pleasure of the pool.

If the Scuba II falls into the water it will simply float and, of course, it is watertight.

Why not try this compact test equipment – after all, the knowledge that you are safe in a thoroughly hygienic pool is worth a little effort.

## Refill pack

Article	Code
<b>Refill pack for Scuba II</b>	
20 DPD No.1 Photometer tablets	
10 DPD No.3 Photometer tablets	
10 PHENOL RED Photometer tablets

Plastic cells, frosted on two sides,  
volume 10 ml, path length 13.5 mm, with lids

Tablet reagents in blister

CHECKIT®Discs with continuous and stable scales

Rear view of the CHECKIT®Comparator  
with diffuser plate, cells and disc

## CHECKIT®Comparator

The Lovibond® CHECKIT®Comparator is a compact and handy colorimetric unit which is suitable for both mobile and static analysis work. Supplied with a generous number of different colour scales, it provides the basis for a comprehensive, easy-to-use colorimetric analysis system.

## CHECKIT®Disc

Each CHECKIT®Disc contains a continuous colour scale which makes it possible to achieve an exact colour match between the colour standard and the sample. These CHECKIT®Discs are specially manufactured in selected materials to retain colour-stability over a long period and guarantee reliable, reproducible measurement results.

Please see pages 20 onwards for tests, ranges and reagents

## Highlights

- Easy operation
- Exact reagent dosing
- Tablet reagents with a guaranteed shelf life of 5/10 years
- Measurement accuracy
- Continuous colour scales

# Comparator 2000+

Colorimeter for regular testing in  
public pools & spas with colour-stable glass standards

## Comparator 2000+

With its accessories, the Lovibond® Comparator system 2000 is an extremely versatile, modular system for testing water. It is simple to use yet is uncompromising in terms of precision and reproducibility of results. It is compact and portable. The integrated prism brings the glass standards of the test discs and the coloured sample into the same field of view.

## Discs

The required accuracy of results is only ensured if stable, fade-free colour standards are used.

Glass colour standards are fade-free, resistant to chemicals and scratchproof. Lovibond® standards are made from coloured glass filters. They comply with international standards, e.g. ISO 7393/2.

For a selection of the most popular test discs see the table on page 26 onwards.

## Cells

We manufacture precision plastic and optical glass cells in line with the highest quality standards. The cells ensure high precision and reproducibility of results.

## Lightning unit

We recommend the use of the battery-operated Lovibond® lighting unit in variable lighting conditions. This guarantees uniform lighting conditions, and ensures greater test accuracy.

## Highlights

- Accurate and reproducible results
- Colour-stable, fade-free glass standards
- In accordance with ISO 7393/2 "Determination of free chlorine and total chlorine"
- Integrated prism

 Please see pages 28 onwards for tests, ranges and reagents

Lighting unit, battery operated

# Photometry

## The History

Several decades have passed since the appearance of the first Lovibond® PC 100 photometer system.

Since that time, Tintometer has become a world-famous name as the manufacturer of photometer systems sold under the brand name of Lovibond®.

Our range of photometer systems extends from the **MD 100\*** and **MD 110\*** as hand-held model over the multi parameter photometer **MD 200\*** as benchtop model in different parameter variants.

The multi-functional **PM 600, PM 620 & PM 630 photometers** provide the answer to all requirements relating to the analysis of water used in modern swimming pools and baths. They offer a wide variety of pre-programmed methods and are therefore suitable for the demands of modern water analysis.

All the parameters which can be measured with Lovibond® photometer systems are set out in the table. This table also explains what parameters can be measured with which photometer.

## Parameter

	MD 100* & MD 110*	MD 200*	PM 620 & PM 630	PM 600
<b>Acid Capacity K<sub>S4.3</sub></b>	■	■		
<b>Alkalinity-M (total)</b>	■	■	■	■
<b>Aluminium</b>			■	
<b>Ammonia</b>			■	
<b>Bromine</b>	■	■	■	■
<b>Calcium Hardness</b>	■	■	■	■
<b>Chlorine</b>	■	■	■	■
<b>Chlorine Dioxide</b>		■	■	
<b>Copper</b>		■	■	■
<b>Cyanuric acid</b>	■	■	■	■
<b>Hydrogen Peroxide</b>		■	■	
<b>Iodine</b>			■	

\* The MD 100 and MD 200 photometer series do not provide all parameters in a single instrument. The number and type of parameters depend on the variant (please refer to the relevant chapter).

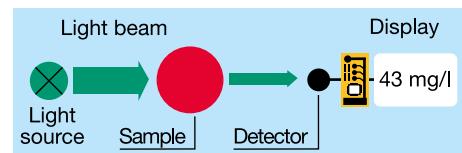

# Parameter

	MD 100* & MD 110*	MD 200*	PM 620 & PM 630	PM 600
Iron ( $\text{Fe}^{2+}$ , $\text{Fe}^{3+}$ ), soluble	■	■	■	
Langelier Water Balance		■	■	
Oxygen, active		■		
Ozone		■	■	
pH value	■	■	■	■
PHMB (Biguanides)		■		
Phosphate		■	■	
Sodium Hypochlorite		■	■	
Sulphate		■		
Total Hardness		■		
Urea	■	■		

## The photometric principle

When specific reagents are added, the water sample takes on a degree of coloration that is proportional to the concentration of the parameter being measured. The photometer measures this coloration.

When a light beam passes through the coloured sample, energy with a specific wavelength is absorbed by the test substance. The photometer determines the coloration of the sample by measuring the transmission or absorption of light of this wavelength (in other words, monochromatic light). The photometer then uses a microprocessor to calculate the required concentration and displays the result.

MD 600

TB 210 IR

PM 630

The MD 100 uses high quality interference filters with long-life LEDs as a light source in a transparency sample chamber.

The units supply accurate, reproducible results very quickly. Other major advantages include ease of operation, ergonomic design, compact dimensions and safe handling.

Using an internal ring memory the last 16 data sets are stored automatically with date, time, parameter and measurement value.

The tests are conducted using either Lovibond® tablet reagents, with long-term stability and a guaranteed minimum 5 or 10 year shelf life, VARIO powder reagents or using liquid reagents.

## Scroll Memory

To avoid unnecessary scrolling for the required test method, the instrument memorizes the last method used before switching off the instrument. When the instrument is switched on again, the scroll list comes up with the last used test method first.

## Zero Setting (OTZ)

It is not necessary to zero the instrument each time. The zero setting is held in memory until the device is turned off (**One Time Zero - OTZ**). The zero setting can be confirmed whenever it is required.

## Data Transfer

The optional available IRIM (infrared interface module) uses infrared technology to transmit measurement data from the MD 100 photometer to one of 3 optional interfaces. These interfaces can be used to connect to a PC, a USB printer 1) or alternatively a serial printer 2).

The unit is supplied complete with data logging software providing easy and rapid transfer of data to the PC. As an option the data can be saved as an Excel sheet or a .txt file.

Measurement data can quickly be printed out, using a specified<sup>1)</sup> USB or alternatively a printer with a serial plug-in connected to the IRIM. Applicable for the following operating systems: Windows® XP, Windows® Vista and Windows® 7/10.

<sup>1)</sup> USB-printer: HP Deskjet 6940 ; <sup>2)</sup> each ASCII Drucker

## Technical Data

<b>Optics</b>	LEDs, interference filters (IF) and photo sensor in transparent sample chamber. Depending on the version, up to 3 different interference filters are used. Wavelength specifications of interference filters: 430 nm $\Delta\lambda = 5$ nm 530 nm $\Delta\lambda = 5$ nm 560 nm $\Delta\lambda = 5$ nm 580 nm $\Delta\lambda = 5$ nm 610 nm $\Delta\lambda = 6$ nm 660 nm $\Delta\lambda = 5$ nm
<b>Wavelength Accuracy</b>	$\pm 1$ nm
<b>Photometric Accuracy<sup>4)</sup></b>	3 % FS ( $T = 20$ °C – 25 °C)
<b>Photometric Resolution</b>	0.01 A
<b>Power Supply</b>	4 micro batteries (AAA), capacity approx. 17 hours or approx. 5000 tests in continuous operation with the display lighting switched off
<b>Auto - OFF</b>	automatic switch-off
<b>Display</b>	backlit LCD (on keypress)
<b>Storage</b>	internal ring memory for 16 data sets
<b>Interface</b>	infrared interface for test data transfer
<b>Additional feature</b>	real time clock and date
<b>Calibration</b>	factory calibration and user calibration. Reset to factory calibration possible
<b>Dimensions</b>	155 x 75 x 35 mm (L x W x H)
<b>Weight</b>	basic unit approx. 260 g
<b>Environmental conditions</b>	temperature: 5–40 °C rel. humidity: 30–90 % (non condensing)
<b>Approval</b>	CE

<sup>4)</sup> tested with standard solutions

## Accessories

Item	Code
Set of 12 round vials with lids Height 48 mm, Ø 24 mm	19 76 20
Set of 5 round vials with lids Height 48 mm, Ø 24 mm	19 76 29
Set of 12 plastic vials (PC), with lid "Multi"-Type 2, Ø 10 mm	19 76 00
Vial stand for 6 round vials Ø 24 mm, acrylic glass	41 89 51
Cleaning cloth for vials	19 76 35
Measuring beaker, volume 100 ml	38 48 01
Cleaning brush, 11 cm length	38 02 30
Plastic stirring rod, 13 cm length	36 41 00
Plastic stirring rod, 10 cm length	36 41 09
4 micro batteries (AAA)	19 50 026
Infrared data transfer module IRIM	21 40 50

## Delivery Content

- Instrument in carrying case
- 4 micro batteries (AAA)
- 3 round vials (glass) with lids
- 1 stirring rod & 1 brush
- Tablet reagents and/or liquid reagents or VARIO Powder reagent
- Warranty information
- Certificate (Certificate of Compliance)
- Instruction Manual

## Verification Standard Kit

The verification standard kit for the MD 100 is designed to assure the user of the accuracy and the reliability of the results related to the integrated wave lengths. The kit contains one zero standard, 6 different vials for checking 6 different wave lengths and allows for checking the complete range of MD 100 photometers. The shelf life of the verification standard kit is two years from the date of production, provided that storage and use are in accordance with the instructions provided. Measurements are taken in mAbs.

**Verification Standard Kit** 21 56 70

## Reference Standard Kits

The reference standards are designed to check the accuracy and the reliability of the results.

It is not possible to calibrate the photometer with the reference standards.

The shelf life of reference standards is two years from the date of production, provided that storage and use are in accordance with the instructions provided.

**Kit Chlorine** for instruments with tablet / liquid reagent 0.2\* and 1.0\* mg/l 27 56 50

**Kit Chlorine** for instruments with tablet / liquid reagent 0.5\* and 2.0\* mg/l 27 56 55

**Kit Chlorine** for instruments with tablet / liquid reagent 1.0\* and 4.0\* mg/l 27 56 56

**Kit Chlorine** for instruments with powder reagent (VARIO) 0.2\* and 1.0\* mg/l 27 56 60

**Kit pH** for instruments with tablet / liquid reagent 7,45\* pH 27 56 70

## Manufacturers Test Certificate M

Besides the "Certificate of Compliance" which is supplied with the MD 100, manufacturers test certificates M are available at cost on request.

Manufacturers test certificates M are individually supplied per instrument and per method.

The manufacturers test certificate M has to be ordered together with the new instrument and cannot be delivered at a later stage.

\* Approximate figure, actual figure specified in certificate of analysis enclosed

## Data Transfer

The photometer MD 110 has integrated Bluetooth® functionality. The app AquaLX® is the ideal supplement to the Lovibond® photometer. Measurement results are transmitted via the Bluetooth® interface for fast evaluation or admini-

stration on smartphones or tablets. All data can be handled and allocated immediately, on-site. The app displays all results in a clear graphic with min. and max. values and supports the export of the data as an Excel® compatible CSV file.

For further information, please refer to [www.lovibond.com/bluetooth](http://www.lovibond.com/bluetooth)

## Delivery Content

- Instrument in carrying case
- 4 batteries (AA)
- 3 round vials (glass) with lids
- 1 stirring rod & 1 brush
- Tablet reagents and/or liquid reagents
- Warranty information
- Certificate (Certificate of Compliance)
- Instruction Manual

\* Delivery without reagents for measuring range  
0.1 - 10 mg/l Cl<sub>2</sub>

# If differentiation is required, glycine tablets can be used.

# MD 200 Photometer

Designed to meet the latest technical requirements, the MD 200 photometer can be used in practically every area of water analysis.

The high-precision optics and top-quality interference filters use long-term stable LEDs as light-source. Because there are no moving parts, the entire measurement device requires absolutely no maintenance.

Precise and reproducible analysis results are obtained in a short time. The units impress with their user-friendliness, ergonomic design, compact dimensions and easy handling.

The tests are conducted using either Lovibond® tablet reagents, with long-term stability and a guaranteed minimum 5 or 10 year shelf life, or using liquid reagents.

## Scroll Memory (SM)

For multi-parameter instruments, the order of the various methods is determined. To avoid unnecessary scrolling for the required test method, the instrument memorizes the last method used before switching off the instrument. When the instrument is switched on again, the scroll list comes up with the last used test method first. This allows for faster access to favoured methods.

## Zero Setting (OTZ)

It is not necessary to zero the instrument each time. The zero setting is held in memory until the device is turned off (**One Time Zero - OTZ**). The zero setting can be confirmed whenever it is required.

Technical Data		Accessories	
<b>Optics</b>	LEDs, interference filters (IF) and photo sensor in transparent sample chamber. Depending on the version, up to 3 different interference filters are used. reagents (order codes)

## Data Transfer

The optional available IRIIM (infrared interface module) uses infrared technology to transmit measurement data from the MD 200 photometer to one of 3 optional interfaces. These interfaces can be used to connect to a PC, a USB printer<sup>1)</sup> or alternatively a serial printer<sup>2)</sup>.

The unit is supplied complete with data logging software providing easy and rapid transfer of data to the PC. As an option the data can be saved as an Excel sheet or a .txt file.

Measurement data can quickly be printed out, using a specified<sup>1)</sup> USB or alternatively a printer with a serial plug-in connected to the IRIIM.

Applicable for the following operating systems: Windows® XP, Windows® Vista and Windows® 7/10.

<sup>1)</sup> USB printer: HP Deskjet 6940 ; <sup>2)</sup> each ASCII printer

Windows® is a registered Trademark of Microsoft Corporation

## Manufacturers Test Certificate M

Besides the "Certificate of Compliance" which is supplied with the MD 200, manufacturers test certificates M are available at cost on request. Manufacturers test certificates M are individually supplied per instrument and per method.

The manufacturers test certificate M has to be ordered together with the new instrument and cannot be delivered at a later stage.

## Verification Standard Kit

The verification standard kit for the MD 200 is designed to assure the user of the accuracy and the reliability of the results related to the integrated wave lengths.

The kit contains one zero standard, 6 different vials for checking 6 different wave lengths and allows for checking the complete range of MD 200 photometers.

The shelf life of the verification standard kit is two years from the date of production, provided that storage and use are in accordance with the instructions provided.

Measurements are taken in mAbs.

### Verification Standard Kit 21 56 70

## Reference Standard Kits

The reference standards are designed to check the accuracy and the reliability of the results.

It is not possible to calibrate the photometer with the reference standards.

The shelf life of reference standards is two years from the date of production, provided that storage and use are in accordance with the instructions provided.

**Kit Chlorine** for instruments with tablet / liquid reagent 0.2\* and 1.0\* mg/l 27 56 50

**Kit Chlorine** for instruments with tablet / liquid reagent 0.5\* and 2.0\* mg/l 27 56 55

**Kit Chlorine** for instruments with tablet / liquid reagent 1.0\* and 4.0\* mg/l 27 56 56

# PM Photometer

Data transfer via Bluetooth® or Infrared

## Highlights

- Intuitive operation
- Back-lit display
- User guide in German, English, French, Spanish, Italian, Portuguese, Polish & Indonesian
- Stores up to 1000 results
- One Time Zero (OTZ)
- Bluetooth® data transfer (PM 630)
- Infrared interface (PM 600 / PM 620) for IRiM data transfer
- Waterproof<sup>\*)</sup>

\*) as defined in IP 68, 1 hour at 0.1 meter

Active oxygen	Iron
Alkalinity-M (total)	Iodine
Aluminium	Langelier Index
Ammonia	Ozone
Bromine	pH
Chlorine	PHMB (Biguanide)
Chlorine dioxide	Phosphate
Copper	Sulphate
Cyanuric acid	Sodium Hypochlorite
Hardness, total	Urea
Hardness, calcium	Water Balance
Hydrogen peroxide	

## Photometer PM 600 / PM 620

The PM 600 and PM 620 photometer range brings pool testing to the next level for discerning pool operators. The ergonomic, portable, waterproof design enables users to select just one unit for accurate analysis of up to 34 parameters anytime and anywhere.

The **PM 600** focusses on the main pool parameters required for balanced water including: Alkalinity, Bromine, Chlorine, Cyanuric Acid, Iron, Calcium Hardness, Copper, Sodium Hypochlorite, Ozone and pH-value. Compatible with the tried and trusted Lovibond® Tablet reagents, it is designed to be robust, reliable yet easy-to-use for any pool operator.

The **PM 620** extends these capabilities to include up to 34 parameter variants from Acid Demand to Urea. Its unique design enables compatibility with Lovibond® Tablet, Liquid and Powder reagents, making it one of the most flexible and complete pool photometers available today.

Both units offer a large, back-lit graphic display to aid analysis by providing on-screen method prompts, information regarding test measurement range and reagent type and automatic countdown timers for accurate reaction periods. The internal memory is capable of storing up to 1000 results with date, time and sample ID. These results can be reviewed at any time and can be downloaded to a PC via an additional Infra-Red module (IRIM)\*.

Supplied in a durable, portable case complete with accessories and space for additional reagents, both photometers provide immediate access to the accurate water analysis expected of the Lovibond® brand, clearly the best choice for water analysis.

\* available as an option : IRIM (infrared interface Modul)

## Photometer PM 630

The PM 630 introduces data management and **Bluetooth®** functionality to the highly proven PM 600 series of photometers. Already simplifying accurate water analysis with 34 pre-calibrated pool methods, the series has now been expanded to include Bluetooth® data transmission.

Now, results can be quickly and easily transferred to smartphones and tablets.

The system is further enhanced by the free Lovibond® App, **AquaLX®**, enabling the immediate review, process and evaluation of measured results directly on-site. Data trends can be monitored with easy-to-view graphical displays with set minimum and maximum values. Any fluctuation to expected results is immediately visible and instant action can be taken.

Furthermore, additional personalized information, such as the name of the pool and the pool engineer can be recorded, providing a complete information record of the measurement.

Records can be transferred at the touch of a

## Technische Daten

<b>Display</b>	Graphic-display
<b>Interfaces</b>	Infrared <sup>1</sup> (PM 600 / PM 620), Bluetooth® 4.0 (PM 630), RJ45 socket for Internet updates <sup>2</sup>

<b>Approval</b>	CE

<sup>1</sup> optional available: IRIM (Infrared Interface Modul)

<sup>2</sup> optional available: connection cable with integrated electronics (RS 232 / RJ-45 plug)

\* tested with standard solutions

button by email either as a graphic or database record, simplifying the transfer, management and sharing of results.

**AquaLX®** complements the Langelier Index App, **PoolM8**, which negates the need for complex calculations for Balanced Water. By simply entering the results of the parameters (pH; Total Alkalinity; Calcium Hardness; Total Dissolved Solid; Temperature.), the App automatically determines and displays the results which can then be saved to create a history and, again, shared via email. Both Lovibond® Apps are available for Android™ and iOS®.

 Please see pages 52 onwards for  
reagents (order codes)

## Reference Standard Kits

The reference standards are designed to check the accuracy and the reliability of the results.

It is not possible to calibrate the photometer with the reference standards.

The shelf life of reference standards is two years from the date of production, provided that storage and use are in accordance with the instructions provided.

**Reference Standard Kit Chlorine** 21 56 30  
0.2\* and 1.0\* mg/l  
for tablet and VARIO methods<sup>1</sup>

**Reference Standard Kit Chlorine** 21 56 35  
0.5\* and 2.0\* mg/l  
for tablet methods only

**Reference Standard Kit Chlorine** 21 56 36  
1.0\* and 4.0\* mg/l  
for tablet methods only

**Reference Standard Kit pH** 21 56 65  
7.45\* pH

\* Approximate figure, actual figure specified in certificate of analysis enclosed

<sup>1</sup> The standard values mentioned in kit 215630 for the VARIO method are for photometer PM 620 only, because this method is not available in the PM 600

## Verification Standard Kit

The verification standard kit for the PM 600 / 620 / 630 is designed to assure the user of the accuracy and the reliability of the results related to the integrated wave lengths.

The shelf life of the verification standard kit is two years from the date of production, provided that storage and use are in accordance with the instructions provided.

Measurements are taken in mAbs.

**Verification Standard Kit** 21 56 80

## Delivery Content

- Instrument in carrying case
- 4 batteries (AA)
- 3 round vials 24 mm ø
- 1 syringe, 1 brush, 1 stirring rod
- 1 plastic beaker 100 ml
- Warranty information
- Certificate of Compliance
- Instruction Manual
- PM 600** (13 parameter, infrared)
  - 100 tablet reagents each for chlorine (free, combined, total), pH value, calcium hardness, alkalinity-M
- Order code: 21 40 60**
- PM 620** (34 parameter, infrared)
  - 100 tablet reagents each for chlorine (free, combined, total), pH value, cyanuric acid, alkalinity-M
- Order code: 21 40 65**
- PM 630** (34 parameter, Bluetooth®)
  - 100 tablet reagents each for chlorine (free, combined, total), pH value, cyanuric acid, alkalinity-M
- Order code: 21 40 70**

# Reagents

## Green chemistry

For decades, the Tintometer® Group has been known as a producer of reagents for water analysis, which are supplied under the brand name Lovibond®.

The wide range of applications requires different types of reagents.

Also, users tend to have personal preferences as to which dosage system to use.

Our broad product range covers blistered tablet reagents, powder reagents packed in aluminium foil and precise dosing liquid reagents in dropper bottles.

With all our reagents, we strive to keep the formulations as environmentally friendly as possible. Hazardous substances are – whenever possible – replaced by harmless and functionally identical substitutes.

Where the required chemistry of the detection method makes the use of these substances absolutely necessary, the concentration levels are lowered to the minimum rate, without compromising the accuracy of the analysis results.

For example, our reagents for Pool & Spa water testing are free from boric acid, which is still frequently being used as an additive in the industry. The European Union (EU) has classified boric acid as a dangerous substance.

The Lovibond® DPD No. 1 tablets are not only 100% free from boric acid, they also guarantee compliance with the buffering effect required by the standard. This characteristic makes the tablet a leader in its field.

## Tablets

The test tablets are manufactured in Germany under tightly controlled conditions on the latest machinery.

Maintaining the highest quality standards permits Tintometer to guarantee our tablet reagents for a minimum of 5 years, and some for as long as 10 years.

We can make this promise because each tablet is hermetically sealed, protecting against challenging environmental conditions. This packaging keeps each tablet in perfect condition, right up until the time it is needed by the user.

Test tablets remain the most consistent and reliable reagent format available, consistently outperforming other reagent formats, and delivering maximum accuracy for the user.

The aluminium foil blister packaging brings added convenience to the tradition of protection achieved in the Lovibond® long established tablet production technology.

With the blister strip, the user just pushes the tablet through the protective foil, straight into the sample. Simple, time-saving and practical.

This type of packaging, long established in pharmaceutical applications, combines all the advantages of protective foil, with convenience for the user.

Each tablet is contained within an individually formed foil cup, lined with the latest aluminium composite material, and guaranteeing product performance.

There are no safety risks if the tablets are used in line with the instructions supplied.

Safety data sheets are available for all reagents.

### Specification and Certificate of Analysis

To express the high quality standard of Lovibond® tablet reagents, specification for each type of tablet as well as a "Certificate of Analysis" for each lot is available in the down-load area at [www.lovibond.com](http://www.lovibond.com).

## Liquids

As a rule, liquid reagents do not consist of a single preparation but comprise several components that need to be added to the sample in a certain order. As both the size and the number of drops have a decisive effect on the resultant colour complex, the reagents need to be added with a high degree of precision.

The useful life of liquid reagents is reduced by temporary contact with oxygen in the air when the bottle is opened as well as by unsuitable storage environments (presence of sunlight or high temperatures). Provided that the bottles are stored within the temperature range +6°C to +10°C, the Lovibond® DPD and Phenol Red solutions can be used for a period of two years from the production date.

## VARIO Powder Packs

The fast and easy use of VARIO Powder Packs has made them extremely popular for water testing applications in many countries throughout the world.

The Lovibond® Powder Pack programme provides users with a real alternative to existing measurement systems.

The Vario Powder Packs are produced to the same high quality standards that have made Tintometer's tablet reagents so successful for several decades.

Parameters from aluminium and chlorine through to sulphate are just some of the well-known tests that are included in the VARIO Powder Pack range.

### Determination of Chlorine, Chlorine Dioxide, Bromine and Ozone with Lovibond® Tablet Reagents

## Membrane filter set

For use when preparing samples for photometric measurements, e.g. for water analysis in natural swimming ponds.

### Advantage

- removes turbid materials from samples
- 0.45 µm mesh meets the requirements of the official German unitary procedure for water testing

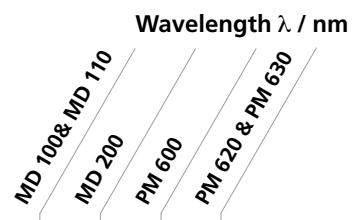

To prevent the effects of light scatter, it must be ensured that all turbid materials are removed from the sample before photometric measurements are carried out. This can be achieved with the Lovibond® membrane filter set.

**Order code:** 36 61 50

(covers 25 x 0.45 µm membrane filters and two 20 ml syringes)

# Natural Swimming Ponds

A natural swimming pond looks like a natural garden pond, but is specifically designed to swim in clean, pure water with no chemicals in it.

The difference between a swimming pond and a swimming pool is that a swimming pool uses chemicals such as chlorine to kill bacteria, whereas a swimming pond cleanses the water naturally. It uses the purifying properties of plants, a filter to extract surface debris such as leaves, and a pump to keep the water circulating through the planting area.

Nevertheless, the water quality has to be checked regularly to make sure that the bathers are safe under all circumstances, e.g. microorganism and other biological, chemical and physical components.

## Chemical Requirements for fresh water - possibly after preconditioning\*

Parameter	Guide Value
Alkalinity-m	≥ 100 mg/l CaCO <sub>3</sub>
Ammonia	≤ 0.5 mg/l
Conductivity	≤ 1000 µS/cm at 20 °C
Hardness	≥ 1.0 mmol/l
Iron	≤ 0.2 mg/l
Manganese	≤ 0.05 mg/l
Nitrate	≤ 50.0 mg/l
pH value	6.0 - 9.0
Total Phosphate	≤ 0.01 mg/l

## Chemical and physical guide values for basin water\*

Parameter	Guide Value
Alkalinity-m	≥ 100 mg/l CaCO <sub>3</sub>
Ammonia	≤ 0.3 mg/l
Conductivity	20 - 1000 µS/cm at 25 °C
Hardness	≥ 1.0 mmol/l
Nitrate	≤ 30.0 mg/l
Oxygen saturation	80 - 120 %
pH value	6.0 - 8.5 (Exception to pH 9.0)
Total Phosphate	≤ 0.01 mg/l
Visibility depth	to the ground or min. 1.80 m
Water temperature	≤ 25 °C, up to 5 days max. 28 °C

# Bathing Water

This applies to any water where the authorities expect a large number of people to bathe and has not imposed a permanent bathing prohibition, or issued advice against bathing. It is the responsibility of the authorities to identify and assess causes of pollution that might affect bathing waters and impair bathers' health during the bathing season.

The basis for the control of all public used natural swimming ponds is the European Directive "2006/7/EG of the European Parliament, dated 15th February 2006. The Directive is valid since 24th March 2006.

## Microbiology

- Escherichia coli
- Enterococci
- Pseudomonas aeruginosa
- Legionella pneumophila
- Cyanobacteria

## Parasites

- e.g. Cryptosporidium

## Chemical and physical characteristics

### Dissolved Oxygen

Dissolved oxygen is probably the most critical quality variable in the water. Oxygen levels in pond systems depend on water temperatures, the water salinity, and the amount of aquatic vegetation and animals.

### pH-value

The pH-value is the determination of the hydrogen ion ( $H^+$ ) concentration in water. The pH scale ranges from 0-14 with a pH of 7 being neutral. A pH below 7 is acidic and a pH of above 7 is basic. An optimal pH range is between 6.5 and 8.5, however it should not be lower than pH5 or above pH9.

pH will vary depending on a number of factors. The pH may rise during the day as phytoplankton and other aquatic plants remove  $CO_2$  from the water during photosynthesis. The pH decreases at night because of respiration and production of  $CO_2$  by organisms. The fluctuation of pH levels will depend on algae levels as well.

### Temperature

Temperature will affect all chemical and biological processes. Temperature therefore has a direct effect on important factors such as growth and oxygen demand. The higher the temperature, the greater the requirement for oxygen and the faster the growth rate of the plants.

### Ammonia

Ammonia is produced from the decomposition of organic wastes resulting in the breakdown of decaying organic matter such as algae and plants. Ammonia levels will depend on the temperature of the water and its pH. For example at a higher temperature and pH, a greater number of ammonium ions are converted into ammonia gas thus causing an increase in toxic ammonia levels within the freshwater.

### Nutrient levels

Nutrient levels refer to the amount of phosphorus and nitrogen that are present in the water. Increased levels of nutrients may be harmful. It can cause excessive plankton growth, potential blue-green algae and oxygen depletion.

# SD-Series (IP 67 waterproof)

The new Lovibond® SD series comprises a range of compact, easy-to-use, hand-held instruments for the accurate measurement of pH, ORP, Con, TDS or Salt. With robust housing and fully waterproof (IP67) casing, these testers are the ideal solution for in-situ testing in environmental, industrial or pool & spa applications.

The intuitive scroll-bar functionality and backlit display enable the easy measurement and simultaneous display of

Result | Temperature | Date & Time

With 25 sets of data storage, each with date and time stamp, the units also enable the easy recalling of data for record keeping requirements.

Designed and manufactured according to Lovibond® quality standards, the devices are equipped with replaceable electrodes to ensure long-life functionality in the field.

Dimensions device:  
205 x 44 x 33 mm (L x W x H)

Dimensions plastic-box:  
232 x 65 x 47 mm (L x W x H)

## Highlights

- Scroll-Through Functionality
- Compact & Robust
- Storage Function
- Backlit Display
- Waterproof (IP67)

## Delivery Content

- Meter in a robust plastic case with hanger
- 2 Batteries AAA
- Lanyard
- Instruction Manual
- additionally: pH 4, 7,10 buffer tablets  
1 strip of 10 tablets each (SD 50 pH)

## Technical Specifications SD Hand-Held Meter

### SD 50 pH

<b>Range</b>	0 - 60 °C, 0 - 14 pH
<b>Resolution</b>	0.01 pH
<b>Accuracy</b>	± 0.05 pH
<b>Resolution temperature</b>	0.1 °C; Accuracy: ± 1 °C, selectable °C / °F system
<b>Selectable buffer system</b>	pH 7.00 or pH 6.86
<b>Calibration</b>	1, 2, or 3 points calibration with auto-recognition (NIST / IUPAC)
<b>Temperature compensation</b>	Automatic
<b>Memory</b>	Time and date display / stamp with 25 sets of data storage (non-volatile)
<b>Display</b>	22 x 22 mm LCD screen, with yellow/green backlight
<b>Power supply</b>	2 x AAA batteries
<b>Battery life</b>	> 350 hours (continuous use, backlight OFF), low battery indicator on LCD screen
<b>Auto-off</b>	8 minutes non-use
<b>Approval</b>	CE
<b>Order code</b>	19 48 00-16 19 48 30-16 in case with batteries, incl. pH buffer set 4.00 / 7.00 and measurement beaker
<b>Spare electrode</b>	19 48 20

### SD 80 TDS

<b>Range</b>	0 - 60 °C, < 10.00 ppt <sup>2)</sup>
<b>Resolution</b>	1 ppm (<= 999 ppm) 0.01 ppt (1.0 - 10.00 ppt)
<b>Accuracy</b>	± 3 % FS
<b>Resolution temperature</b>	0.1 °C; Accuracy: ± 1 °C, selectable °C / °F system
<b>Auto switch over ppm and ppt</b>	ppm: 0 - 999 ppt: 1.00 - 10.00
<b>Calibration</b>	up to 2 points calibration <b>manual mode</b> ± 50 % adjustable value
<b>Temperature compensation</b>	Automatic
<b>Memory</b>	Time and date display / stamp with 25 sets of data storage (non-volatile)
<b>Display</b>	22 x 22 mm LCD screen, with yellow/green backlight
<b>Power supply</b>	2 x AAA batteries
<b>Battery life</b>	> 100 hours (continuous use, backlight OFF), low battery indicator on LCD screen
<b>Auto-off</b>	8 minutes non-use
<b>Approval</b>	CE
<b>Order code</b>	19 48 03-16
<b>Spare electrode</b>	19 48 22

### SD 60 ORP/Redox

<b>Range</b>	0 - 60 °C, -1800 ~ 1800mV
<b>Resolution</b>	0.1 mV (within ± 1000 mV) 1 mV (outside ± 1000 mV)
<b>Accuracy</b>	± 20 mV
<b>Resolution temperature</b>	0.1 °C; Accuracy: ± 1 °C, selectable °C / °F system
<b>Calibration</b>	1 point calibration with ± 150 mV adjustable ORP value
<b>Temperature compensation</b>	Automatic
<b>Memory</b>	Time and date display / stamp with 25 sets of data storage (non-volatile)
<b>Display</b>	22 x 22 mm LCD screen, with yellow/green backlight
<b>Power supply</b>	2 x AAA batteries
<b>Battery life</b>	> 350 hours (continuous use, backlight OFF), low battery indicator on LCD screen
<b>Auto-off</b>	20 minutes non-use
<b>Approval</b>	CE
<b>Order code</b>	19 48 01-16
<b>Spare electrode</b>	19 48 21

### SD 70 Con

<b>Range</b>	0 - 60 °C, < 20.00 mS <sup>1)</sup>
<b>Resolution</b>	1 µS (<= 1999 µS) 0.01 mS (2.0 - 20.00 mS)
<b>Accuracy</b>	± 3 % FS
<b>Resolution temperature</b>	0.1 °C; Accuracy: ± 1 °C, selectable °C / °F system
<b>Auto switch over µS and mS</b>	µS: 1 - 1999 mS: 2.00 - 20.00
<b>Calibration</b>	1 or 2 points calibration for <b>auto</b> mode Standard: 1413 µS or Standard: 12.88 mS up to 2 points calibration for <b>manual</b> mode ± 50 % adjustable value
<b>Temperature compensation</b>	Automatic
<b>Memory</b>	Time and date display / stamp with 25 sets of data storage (non-volatile)
<b>Display</b>	22 x 22 mm LCD screen, with yellow/green backlight
<b>Power supply</b>	2 x AAA batteries
<b>Battery life</b>	> 100 hours (continuous use, backlight OFF), low battery indicator on LCD screen
<b>Auto-off</b>	8 minutes non-use
<b>Approval</b>	CE
<b>Order code</b>	19 48 02-16
<b>Spare electrode</b>	19 48 22

### SD 90 Salt

<b>Range</b>	0 - 60 °C, < 20.00 ppt $\triangleq$ 2.00 % <sup>3)</sup>
<b>Resolution</b>	0.01 % (when set to "P" % unit) 1 ppm (< 2000 ppm) 0.01 ppt (2.0 - 20.00 ppt)
<b>Accuracy</b>	± 3 % FS
<b>Resolution temperature</b>	0.1 °C; Accuracy: ± 1 °C, selectable °C / °F system
<b>Auto switch over ppm and ppt</b>	ppm: 0 - 1999 ppt: 2.00 - 20.00
<b>Calibration</b>	up to 2 points calibration <b>manual mode</b> ± 50 % adjustable value
<b>Selectable unit system</b>	"P" % or ppt / ppm
<b>Temperature compensation</b>	Automatic

# SensoDirect 110

Determination of:  
pH (0-14)  
Conductivity (mS/cm)  
Salinity (%)

## pH110

The SensoDirect pH110 is a high quality, portable, battery operated pH meter. The instrument is equipped as standard with protective casing and built-in electrode holder.

The gel electrode of the SensoDirect pH110 is temperature resistant over the range 0 - 80 °C. It is fitted with a BNC connector as standard.

### Technical data pH110

<b>Range</b>	0 - 14 pH
<b>Resolution</b>	0.01 pH
<b>Accuracy</b>	± 0.07 pH (pH5-pH9) ± 0.1 pH (pH4-pH10) ± 0.2 pH (pH1-pH3.9) ± 0.2 pH (pH10,1-pH13) 23 ± 5 °C, after calibration
<b>Ambient conditions</b>	0 - 50 °C 0 - 80 % rel. humidity (non condensing)
<b>Battery</b>	9 V block
<b>Dimensions</b>	208 x 110 x 34 mm (L x W x H)
<b>Weight</b>	approx. 380 g
<b>Approval</b>	CE
<b>Order Code</b>	72 13 00

### Accessories SensoDirect pH110

Code	Article
721330	pH-electrode plastic/gel, type pH110
721247	pH-buffer, 4.00 (25°C), 90 ml
721248	pH-buffer, 7.00 (25°C), 90 ml
721249	pH-buffer, 10.00 (25°C), 90 ml

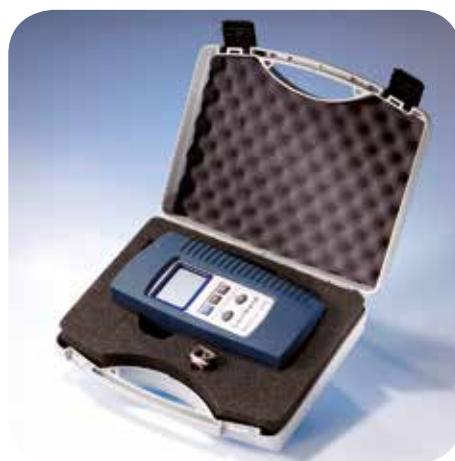

## Con110

The SensoDirect Con110 is a compact and versatile meter. The unit is extremely easy to use and is equipped as standard with a protective casing and built-in electrode holder.

It is equipped with a LC display showing two or three decimal places and a measuring range either of 0.001 - 1.999 or 0.01 - 19.99 mS/cm.

As conductivity measurement also depends on temperature, the SensoDirect Con110 includes an automatic temperature compensation feature.

The SensoDirect Con110 can be calibrated and adjusted using a potentiometer.

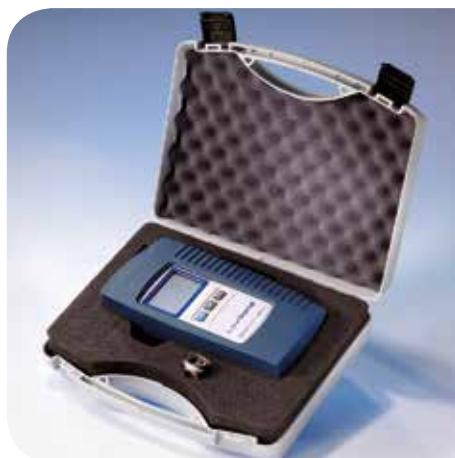

### Technical data Con110

<b>Range</b>	0.001 - 1.999 mS/cm 0.01 - 19.99 ms/cm
<b>Resolution</b>	0.001 / 0.01 mS/cm
<b>Temperature compensation</b>	0 - 100 °C automatically 2 %/K, 25 °C
<b>Accuracy</b>	± 3 % Full Scale ± 1 Digit (23 ± 5 °C)
<b>Ambient conditions</b>	0 - 50 °C 0 - 80 % rel. humidity (non condensing)
<b>Battery</b>	9 V-Block
<b>Dimensions</b>	208 x 110 x 34 mm (L x W x H)
<b>Weight</b>	approx. 380 g
<b>Approval</b>	CE
<b>Order code</b>	72 23 00

### Accessories SensoDirect Con110

Code	Article
724400	Conductivity sensor
722250	Conductivity calibration solution, 1413 µS/cm, 500 ml

## Salt110

The SensoDirect Salt110 provides fast, accurate readings and the convenience of a remote probe separately.

The measuring range of this salt tester is 0 to 10 % salt (% weight).

The SensoDirect Salt110 includes an automatic temperature compensation feature.

The unit is extremely easy to use and is equipped as standard with a protective casing and built-in electrode holder.

### Technical data Salt110

<b>Range</b>	0 - 10 % Salt
<b>Resolution</b>	0,01 % Salt
<b>Temperature compensation</b>	0 - 50 °C, automatically
<b>Accuracy</b>	± 0,5 % Full Scale (23 ± 5 °C)
<b>Ambient conditions</b>	0 - 50 °C 0 - 80 % rel. humidity (non condensing)
<b>Battery</b>	9 V-Block
<b>Dimensions</b>	208 x 110 x 34 mm (L x W x H)
<b>Weight</b>	approx. 380 g
<b>Approval</b>	CE
<b>Order code</b>	72 33 00

# SensoDirect 150

## All in one Hand-held Meter

The SensoDirect 150 combines the features of several hand-held meters. It is designed for multi purpose operation and measures pH/Redox, dissolved oxygen and conductivity/TDS.

The SensoDirect 150 incorporates an intuitive user interface, large, easy to read display and is supplied with a sturdy handy case with electrodes, buffer solution and accessories.

## SensoDirect 150

<b>Display</b>	Large LCD display with contrast adjustment
<b>Parameter</b>	pH: 0 to 14.00 pH ORP: ± 1999 mV Conductivity: 200 µS / 2 mS / 20 mS / 200 mS TDS (Total Dissolved Solids): Dissolved Oxygen: 0 to 20.0 mg/l
<b>Data Logger</b>	Real time data logger
<b>Data Memory</b>	Auto or manual data memory, 16000 data sets
<b>Data Hold</b>	Max, Min
<b>Interface</b>	USB, RS232
<b>Probes</b>	pH, ORP, Conductivity/TDS, Dissolved Oxygen and Temperature
<b>Power off</b>	Auto shut off or manual off
<b>Data Output</b>	RS 232 PC serial interface
<b>Power Supply</b>	DC 1,5 V battery ( UM3, AA) x 4 PCs or DC 9V adapter in
<b>Software</b>	Data acquisition software Data logger software
<b>Dimensions</b>	220 x 120 x 40 mm (L x B x H)
<b>Weight</b>	approx. 625 g (Instrument with batteries)
<b>Approval</b>	CE

## pH/Redox/Temperature

<b>Range</b>	pH 0 to 14 PH mV -1999 mV to 1999 mV
<b>Resolution</b>	0 - 14 pH, 0.01 pH 0 - 1999 mV, 1 mV

# Turbidity Measurement

Photo: Schwimmbad & Sauna, [www.schwimmbad.de](http://www.schwimmbad.de)

The term "turbidity" is used to describe the cloudiness or milkiness of water.

In physical terms, turbidity is due to particles of varying sizes scattering or absorbing light, giving the water in question a cloudy appearance.

This turbidity is caused by suspended particles such as sludge, limestone, yeast or microorganisms.

The phenomenon of turbidity is measured using optoelectronic meters. An artificial light source emits a known intensity of light through a sample. The suspended particles scatter or absorb the light.

The scattered light is then recorded on a photodetector.

Scattered light is generally measured at an angle of 90°. This measurement principle is known as nephelometry.

The results are expressed in terms of FNU (Formazin Nephelometric Units) - identical with NTU (Nephelometric Turbidity Units) and TE/F (Turbidity Units Formazin).

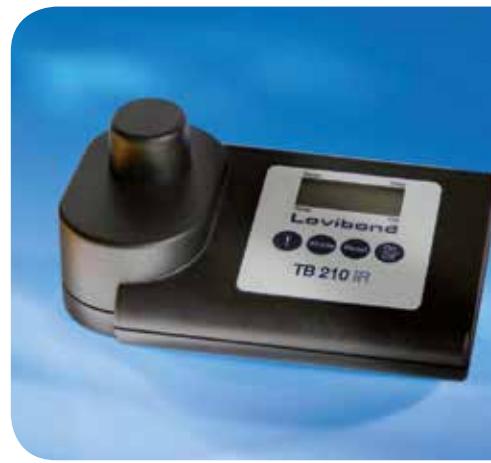

# TB 210 IR with infrared light source (EN ISO 7027)

The compact Lovibond® infrared turbimeter TB 210 IR is designed to allow fast, precise onsite testing. The unit measures the scattered light at an angle of 90°, as stipulated in EN ISO 7027.

The wide measuring range from 0.01-1100 TE/F = NTU = FNU makes the instrument suitable for various applications, ranging from drinking water to waste water.

As infrared light is used for measurement purposes, the unit can be used to test both coloured and colourless liquids.

Technical data		Accessories
<b>Measurement cycle</b>	approx. 8 seconds	Turbidity standard set T-CAL (< 0.1, 20, 200, 800 NTU) <b>Order code:</b> 19 41 50

- Warranty information
- Certificate of Compliance
- Instruction manual

# Pool Software

Photo: Elsebad, Schwerte, [www.elsebad.de](http://www.elsebad.de)

## Highlights

- Analyses water balance
- Set parameter boundaries specific to your customer
- Customizable for up to 9,999 customers, 99 pools per customer
- Recommends chemical dosing
- Suitable for domestic and public pools
- Can be used independently of PM 600/620 with manual readings

The Lovibond® pool software is an ideal tool for commercial pool operators to measure pool parameters, analyse the results and propose the recommended treatments. Customizable for up to 9,999 customers and 99 pools per customer, the pool software provides a self-contained unit for operators 'on-the-road'.

Designed to enhance the functionality of the Lovibond® PM 600/620 photometers, the pool software analyses all the essential pool parameters required for Balanced Water. Once the analysis has been made, the software then automatically tries to 'restore' the water's balance; recommending the required chemical dosing

to bring the water as close as possible to zero on the Langelier Saturation Index.

Operators can rest assured their customers are accurately informed and the right amount of chemicals are administered.

**Order code: 97 50 00**

The pool software can either be used as an integrated software tool with the Lovibond® PM photometers or as a stand-alone application to analyse the Balanced Water parameters of swimming pools.

Designed originally to enhance the functionality of the PM photometers, AquaMATE downloads the measured parameter information via an infrared modem, stores the data to a PC and builds a series of tests which are then allocated to a specific swimming pool of a particular customer. This data, together with the swimming pool configuration data, can then be used to interpret the water quality and analyse which parameter corrections are required and what chemical dosing is recommended.

When used independently of the PM photometers, the operator can either enter the values via the built-in tools or manually enter the measurement results.

The pool software has been designed as a modular application so multi user interfaces may be displayed on screen at any one time by selecting the icons as depicted below:

## General configuration

The General Configuration Module enables the user to:

Select the User Interface language:  
English, German, French, Italian, Spanish.

Enter customer data as it should appear on the header of printed documents. Preview capability is available.

Set the parameter boundaries for Chlorine and Bromine treated swimming pools respectively per category.

The categories are:

- Private Pools
- Residential Pools
- Hotels, Schools, Camps, Vacation Resort Pools
- Public Pools

The parameter boundaries for selection are:  
Free or Available Chlorine, Combined Chlorine, Total Bromine, pH and Cyanuric Acid.

In the Customer File, the user can store, modify or delete Customer and Pool data. It can contain up to 9,999 customers and 99 pools per customer.

their availability. Once the start parameters have been set, clicking on the "Restore water balance" button opens a new window with dosage instructions or information about the failure to improve the water balance.

## Product configuration

The Product configuration module allows the user to add and remove chemical products that might be required to correct the water balance. These are acids and bases needed to lower or raise the pH and/or Total Alkalinity, chemicals used to raise the Calcium Hardness and Cyanuric Acid required for protecting chlorine from UV depletion.

## Data transfer from photometer

This module allows the user to import test data from the PM photometers to the PC.

If a Photometer is not available or additional test results have to be added (such as Temperature or TDS), it is possible to do this manually.

## Water balance

The Water Balance module enables the user to interpret the pool water quality through a given set of parameters and modify a certain number of water parameters in manual or automatic mode.

In manual mode, after setting the start parameters, the user can raise or lower the pH or Total Alkalinity (TA), the Calcium Hardness (CH) and/or increase the Cyanuric Acid (CA) concentration. Scrollbars and textboxes can be used to alter parameter values.

Provided that all necessary parameter values are available, the Langelier Saturation Index (SI) is calculated continuously when changes in one of the values occur.

In automatic mode, the software tries to restore the water balance by trying to equalise the SI to zero or a value as close as possible to zero. It takes into account the parameter boundaries set in the "General Configuration" module and the possible choice of products (chemicals) and

## Handy tools

### Chlorine dosage

Enables the user to calculate the amount of a selected Chlorine donor needed to raise the free or available free Chlorine concentration to the desired level.

### Acid demand

Enables the user to calculate the quantity of acid needed to reduce the pH of the pool water to a certain value using the commonly named "acid demand" method.

### Phosphate removal

Calculates the quantity of Phosphate remover (Lanthanum compounds) needed to either reach zero Phosphate or the desired low level.

### Salt chlorination

Analyses the amount of salt to be added to the pool water in order to restore the ideal concentration of salt according to the salt chlorination equipment producer's specifications.

## Customer file

## System requirements

Processor	minimum: 4 MHz, recommended: 1 GHz
RAM	minimum: 96 MB, recommended: 512 MB
Screen resolution	minimum: 1024 x 768, (screen depending)
Operating system	Windows® XP, Windows® Vista, Windows® 7
Disc space	approx. 10 MB

The software has been developed using the .NET framework 2.0 that primarily runs on Microsoft® Windows® platforms. It may be necessary

to update the application soon in order to make it fully compatible with Windows® Vista and Windows® 7, using .NET framework 3.5 or 4.0.

The .NET Framework Client Profile is not supported on IA-64-based (Itanium)
